DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Atalar et al (US 6,263,229).

As regards to claim 1, Atalar et al teach a magnetic resonance imaging receive circuit including a first portion having an rf antenna and decoupling circuitry adjacent to the antenna, and a spaced apart second portion having mode control circuitry for causing the decoupling circuitry to switch the circuit between an rf receiver mode in which the antenna is tuned to receive an rf signal, and a decoupled mode in which end terminals of the antenna are held at a substantially equal DC bias potential; and balanced cables connecting the first and the second portions transmitting a DC control to the decoupling circuitry during its decoupled mode, and transmitting differential rf signals to the second portion when the circuit in receive mode (figures 1,11; column 1, lines 21-65; column 6, lines 1-40; column 10, lines 42-52).

As regards to claims 2-12, Atalar et al further teach balun, antenna and the coaxial cables and impedance matching between them, with DC bias on the balanced cable; and further teaching receive mode antenna and in decoupled mode to restrict the

current flow in an catheter used with magnetic resonance device (figures 1, 2, 6 and 9-11).
